

The 15th R & R Forum

Research & Reconstruction Forum

일자 2026년 5월 14(목) - 15(금)

장소 전남대학교 광주캠퍼스 용지관

김규남 (Kyu Nam Kim)

현) 소속: 성균관대학교 의과대학 강북삼성병원

(Sungkyunkwan University School of Medicine, Kangbuk Samsung Hospital)

전공 및 학력: 성형외과, MD, PhD

■ 이력 및 경력

Graduated from Ulsan University School of Medicine (MD)

Graduated from Chungnam National University School of Medicine (PhD)

Plastic surgery resident at Department of Plastic and Reconstructive Surgery, Asan Medical Center

Assistant professor at Ulsan University Hospital, Ulsan University School of Medicine

Associate professor at Konyang University Hospital, Konyang University School of Medicine

Professor at Kangbuk Samsung Hospital, Sungkyunkwan University School of Medicine

■ 주요 논문 및 출판

- 1) Retrospective Analysis of 50 Hemi-Keystone Flap Head and Neck Reconstructions with Scar Assessment. *Journal of Clinical Medicine*, 2026-03.
- 2) Patient and Observer Scar Assessment of Facial Keystone Flap Reconstruction in Korean Patients. *Journal of Clinical Medicine*, 2025-12.
- 3) Uneasy (Intractable) Head and Neck Defect Coverage With Easy and Reliable Local Flap Techniques: A Retrospective Case-Based Study of Perforator-Plus Peninsular Flap and Modified Keystone Flap. *Laryngoscope Investigative Otolaryngology*, 2025-10.
- 4) Modified Keystone Perforator Island Flap Techniques for Small- to Moderate-Sized Scalp and Forehead Defect Coverage: A Retrospective Observational Study. *Journal of Personalized Medicine*, 2023-02.
- 5) Modified Keystone Perforator Island Flap for Tension-Reducing Coverage of Axillary Defects Secondary to Radical Excision of Chronic Inflammatory Skin Lesions: A Retrospective Case Series. *Biomed Research International*, 2022-09.
- 6) Modified Mini-Keystone Flaps for Coverage of Tiny Volar Pulp Defects of the Fingertips in Cases with Missing Amputation Skin Stumps: A Retrospective Study. *Journal of Clinical Medicine*, 2022-06.
- 7) A comparative study for tension-reducing effect of Type I and Type II keystone perforator island flap in the human back. *Scientific Reports*, 2021-08.
